Summary

B.Tech Data Science student with hands-on experience in Machine Learning, Deep Learning, NLP, Computer Vision, Predictive Analytics, and Full Stack Development. Proficient in Python, SQL, TensorFlow, Scikit-learn, FastAPI, React JS, Power BI, Hadoop, and AWS. Proven ability to build AI-powered applications, automate ETL pipelines, deploy production REST APIs, and deliver business intelligence dashboards that drive measurable, data-driven decisions.

Skills

Programming & Querying: Python, SQL, JavaScript, Java, C++, HTML, CSS

Machine Learning & AI: Machine Learning, Deep Learning, NLP, CNN, Computer Vision, TensorFlow, Scikit-learn, Keras, Transfer Learning, Predictive Modeling

Data Analytics & BI: EDA, Feature Engineering, Statistical Modeling, RFM Analysis, Power BI, Advanced Excel, Pandas, NumPy, Matplotlib, Chart.js

Web & Backend: React JS, Next JS, Node JS, Express JS, FastAPI, REST API Development, Tailwind CSS, Bootstrap

Databases & Big Data: MySQL, MongoDB, SQL, NoSQL, Hadoop, Apache Hive, Apache Pig, Sqoop, ETL Pipelines

Cloud & Tools: AWS EC2, AWS S3, AWS IAM, Docker, Git, GitHub | Core: DSA, Agile, Cyber Security, Networking

Experience

Freelance Data Analyst

January 2024 – Present

Self-Employed (Remote) **Tools Used:** Python, SQL, Power BI, Excel, TensorFlow, Scikit-learn

- Designed and delivered 10+ end-to-end analytics dashboards and automated reporting pipelines — cutting manual reporting effort by 60% for retail and e-commerce clients.
- Performed complete data lifecycle tasks including collection, cleaning, EDA, feature engineering, and predictive modeling; improved business forecast accuracy by 20% across engagements.
- Built NLP-based text classification, sentiment analysis, and AI-powered recommendation systems to automate customer feedback processing and personalize product suggestions at scale.
- Delivered KPI monitoring frameworks, RFM segmentation, cohort analysis, and sales trend dashboards supporting data-driven decisions for 5+ business clients across diverse industries.

Projects

SentimentLens Pro

Python | FastAPI | NLP | Scikit-learn | Chart.js

January 2025 – March 2025

- Engineered a production-ready real-time sentiment analysis web application using FastAPI and NLP pipelines, achieving 92% classification accuracy on diverse multi-domain datasets.
- Designed and deployed multi-class REST APIs (Positive/Negative/Neutral); integrated Speech Recognition API for voice-based input and geolocation tracking to map sentiment trends across regions.
- Built interactive Chart.js analytics dashboard for live trend visualization; optimized TF-IDF + logistic regression inference pipeline to under 200ms response time for real-time production use.

Smart Agriculture Assistant App

Python | TensorFlow | CNN | Deep Learning | Kivy

September 2024 – December 2024

- Developed AI-powered mobile app using TensorFlow CNN with MobileNetV2 transfer learning — achieving 95%+ accuracy detecting 38+ plant diseases from leaf images, deployable on low-end Android devices.
- Built end-to-end deep learning pipeline: data augmentation, model training and evaluation, on-device inference; applied quantization and pruning reducing app size by 30% with no accuracy loss.
- Integrated crop recommendation engine (soil/climate parameters), live weather forecasting API, multilingual voice support (5+ languages), and farmer assistance chatbot for a comprehensive agri-tech solution.

Customer Behavior Analytics Dashboard

Python | SQL | Power BI | Pandas | Scikit-learn

June 2024 – August 2024

- Processed and analyzed 500K+ customer transaction records using Python Pandas and optimized SQL queries to extract behavioral patterns, purchase cycles, and revenue trends for business intelligence.
- Built 5+ interactive Power BI dashboards for KPI monitoring, RFM segmentation, churn prediction, and revenue forecasting — adopted by stakeholders for weekly business review sessions.
- Applied Pareto Analysis and cohort retention analysis identifying top 20% of customers driving 80% of revenue; automated ETL pipeline reducing data preparation time by 35%.

Personal Portfolio Website

React JS | Next JS | Tailwind CSS | Vercel

April 2024 – May 2024

- Built fully responsive portfolio using React JS and Next JS with Tailwind CSS; achieved 95+ Google Lighthouse performance score via lazy loading, code splitting, and image optimization.
- Implemented dynamic project cards, smooth scroll animations, dark/light theme toggle, and contact form; deployed on Vercel with GitHub CI/CD pipeline for zero-downtime continuous delivery.

Awards & Certifications

- Machine Learning & Deep Learning using Python and TensorFlow: Hands-on model training, evaluation, and deployment across classification, regression, and NLP tasks.

- Power BI Dashboard Development and Data Analytics: Advanced DAX formulas, data modeling, RLS, and interactive multi-page report design for business intelligence.
- Full Stack Web Development using React JS and Node JS: End-to-end web application development, REST API integration, and deployment with modern JavaScript frameworks.

Education

B.Tech in Data Science	Graduating: 2027
CHH. Nagar, Maharashtra CGPA: 8.0 / 10.0	
Sant Dnyaneshwar Vidyalaya	SSC
Parbhani, Maharashtra Score: 87.80%
